

ADA series

Innovative ADA Solutions

Model: ADA+2 (Stations)

ADA With 2 Stalls Is A Win, Win For Everyone

The ADA+2 is beautifully designed, with both ADA and two unisex stalls. You and your customers will be completely amazed at how easy it is to access and operate.

The air-ride suspension system lowers the trailer gently to the ground where users have a short step, or use a slight-angled ramp to access the stalls. Inside, bright LED lights reveal a comfortable bathroom, complete with a sink, mirror and vacuum flush ceramic toilet.

The vacuum flush system has many benefits over a standard flushing system. A vacuum flush system hides and quickly removes the waste, while at the same time drawing 20 gallons of air from the room. This added ventilation is a big plus for odor control.

Take the time to learn about all the other unique features of a Satellite Suites trailer and you'll be convinced, this is a Win, Win for everyone!

LED LIGHTS

100% Led Light Package Conserves Energy And Reduces Maintenance Costs

Vacuum Flush System

The vacuum system used in all Satellite Suites ADA trailers allows you to remove waste to a remote tank or sewer up to 300' away from the trailer!

The Ada+2 Rests On The Ground, Making It Easy To Enter And Exit

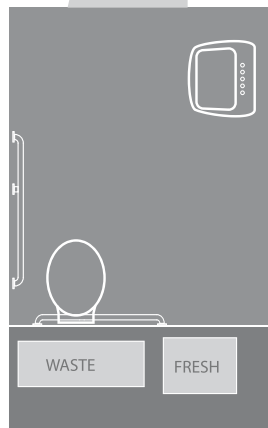

Single Station ADA

The Single Station ADA is surprisingly inexpensive, making it the ideal solution at events where other trailers are being used. With AC/Heat, flushing, lights and running water, this trailer satisfies those who prefer a traditional bathroom.

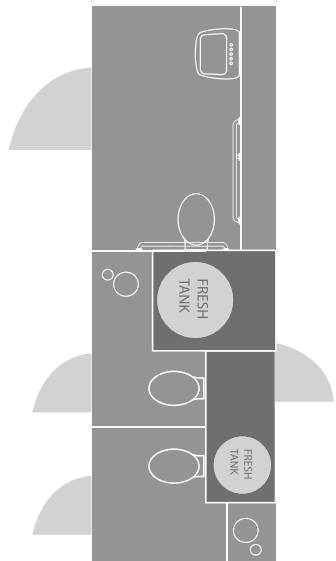

The vacuum flush system used in this trailer also has many benefits over a standard flushing system. A vacuum flush system hides and quickly removes the waste, while at the same time drawing 20 gallons of air. This added ventilation is a big plus for odor control.

SPECIFICATIONS

Model	Single Station
Weight	3,200 lbs
Weight (axle)	5,200 lb
No. of Stations	1
Length w tongue	10' 15'
Width (floor plan)	6'
Width (road)	8' 5"
Width (ramp down)	14'
Ride Height w AC	10' 4"
Kneeling Height w AC	9'2
Fresh Tank	63 gal.
Waste Tank	123 gal.

Model	ADA+2
Weight	8,200 lbs
Weight (axle)	10,000 lb
No. of Stations	3
